Dear Sir/Madam:

Praised be Jesus and Mary!

As a requirement of our course IT12/L - System Integration and Architecture, we, the third-year students of the Bachelor of Science in Information Technology of the University of Mindanao, are required to carry out a study that would produce a computer-based information system that would help a company improve productivity in their daily operations. We are to choose three (3) companies and carry out a preliminary data gathering to come up with a single company profile that will be used as our official company, which will be the recipient of the software solution.

In lieu of this, our group would like to humbly ask permission from your good company to allow us to conduct an interview with one of your personnel and/or staff regarding your business process concerns.

Your favorable response is highly appreciated.

Respectfully Yours,

**DEQUIT NEO DOMINIQUE OGATIS**
